Request for Change of Operator

Docket No. 30-2021

April 8, 2021

A. B. Energy LLC (“ABE”) is a Montana limited liability company with its principal place of business approximately 30 miles north of Chester and 6 miles south of the Montana/Alberta border. The owners and operators of ABE are Arnie G. Woods and Bo D. Woods, a father and son team who were both born in Liberty County and raised on the family farm and ranch north of Chester.

Arnie’s career in the oilpatch began in 1970 when he worked for Cardinal Drilling Company for several years and thereafter for Phillips Petroleum Company, Great Northern Drilling, Branch Oil and Gas, Western Natural Gas, FX Drilling Company and Athena Energy. During this 50 year career he has been extensively involved in drilling, completion, rework and production operations, and just about anything and everything else involving oil and gas exploration, development and production.

Bo commenced working in the oilpatch in 2001, starting with PanCanadian Energy and then Encana Energy, Omimex Canada, Sands Oil Company and Three Forks Resources. In essence, Bo knows how to keep marginal wells functioning economically and efficiently.

ABE purchased Laird Creek oil and gas wells in 2011, Haystack Butte and West Haystack Butte gas wells in 2012, Snoose Coulee gas wells in 2015, Bears Den oil wells in 2017 and Taylor Well Operating gas wells in 2019.

ABE presently owns and operates 158 wells bonded with the MBOGC and an additional 8 federal wells bonded with the BLM. Of these wells only 7 are presently shut-in and ABE will endeavor to either return to production or plug and abandon.

There are 143 wells included in this Change of Operator request, 29 of which are presently shut-in. ABE intends to test each one of these shut-in wells and determine which to place back on production and which to plug and abandon. It goes without saying that shut-in wells are of no economic benefit to ABE and therefore a best efforts testing operation will take place in order to determine which of these shut-in wells are capable of commercial production. However, ABE needs an adequate amount of time to test and evaluate each of these wells.

ABE owns and operates an oil and gas well service rig which it utilizes for all manner of work and operations on its wells. In addition, it owns and operates a variety of other pieces of oilfield equipment and machinery necessary to supplement its operations and maintain its oil and gas wells in good operating condition.

In addition to operating the above referenced wells, Arnie and Bo conduct farming and ranching operations on lands they own and lease, provide a myriad of contract oilfield services for others, and also provide trucking services for neighboring farmers and ranchers.
