Plugging and Reclamation Bond Review

1998

- Bond amounts were set during 1998 following a lengthy scoping process which involved discussions with county commissioners, the governor, legislators, operators, and landowners.
- 100% coverage of plugging and restoration liability by multiple well bonds was not intended in the statute and is unreasonable when plugging liability is offset by the value of producing wells and equipment and the opportunity for new operators to assume the risk and operate the wells.
- Committee Proposed Bonding changes:
 - o Single well bond:

0-2000 feet	\$1,500
2001-3500'	\$5,000
3,501' and deeper	\$10,000

- New multiple well or "blanket" bond:
 - \$50,000 for an unlimited number of wells
- Required existing \$10,000 multiple wells bonds be increased to \$25,000 which would increase to \$50,000 with change of operator.
- Amended well reporting and well plugging requirement rules.

2015

- 2015 Legislature passed HB226, in which the Board receives \$650,000 at the start of each biennium into the Damage Mitigation account from the interest income of the RIT fund. There is a \$1 million cap on the Damage Mitigation account.
- Prior to the change in statute the Board had priority for grants through the Resource
 Development Grant program, which required participation in a lengthy application process even though funding wasn't assured.

2019

- Started reviewing and sending letters to operators with bonds that have no active wells.
- Continue to review and send letters to operators with inactive wells in response to landowner and/or mineral owner complaint.
- Adopted policy for Board review of change of operators (which was amended in 2020) for new
 operators that would result in 10 or more wells to be covered by a single, multiple well bond,
 and for existing operators if the approval of a change of operator request would result in 5 or
 more inactive wells on a multiple well bond. Also included is a referral of a change of operator
 for any commercial disposal well.

6/14/2023

Today

Funding and an established orphan well program are in place.

Damage Mitigation Account

- o Used for plugging orphaned wells (pre-regulatory and newly orphaned).
- Funds derived from bond forfeitures and interest on Resource Indemnity and Ground Water Assessment Tax (RIGWAT).
- o Oil and gas industry is largest contributor to RIGWAT.

Orphan well program

- Over 1,000 wells reviewed through the program.
- Ranked based on many factors include public health and safety, existing or potential environmental threats, and potential disruption to surface use.
- o 448 wells plugged and location restored (pre-regulatory & newly orphaned).
- o 38 surface restoration only.
- o 271 wells transferred to new operators.
- o Statutes limit the Board's ability to plug wells with remaining economic life.
- o All current orphan wells under contract to plug with federal initial grant.

Change of operator reviews

 Since the start of 2019, 53 change of operator requests have been referred to the Board for review; 24 for new operator and 30 for existing operators. 20 of those reviews have resulted in increased bonding to the amount of \$1,161,500 more than standard bonding requirements.

Inactive well reviews

Phase 1 of inactive wells presented in December 2018 consisted of 146 inactive wells.
 This process has resulted in 89 wells being plugged, transferred, or re-activated, and 13 wells orphaned through bond forfeiture. We are still working with a couple of these operators to get additional wells on this list plugged.

Going Forward

Current rules provide:

- o authority to act on any wells that have been inactive for over 1 year, with recognition that there may be valid future uses for a wellbore;
- o authority to limit the number of wells on a multiple well bond, or double the required bond amounts in established in rule;
- o authority for board review of proposed plugging and reclamation bonds; staff referral of any administrative approvals, which would include change of operator requests.
- Inflation could be justification for increasing in the base bond amounts through rulemaking.
- Under current rules the Board could establish a policy that limits the number of wells on a multiple well bond.
- Increased bonding would primarily be in place for new wells. Well depth is always a good tool to used, and depth is generally proportional to location restoration costs.
- The federal orphan well funding has brought the topic of bonding and financial assurances for wells on many states radar. IOGCC will be actively working with states to gathering information and hope to have further discussions among states this fall.
- There are still a significant number of inactive wells on single- and multiple-well bonds, and bonds that cover no active wells and are continually being reviewed by Board staff.

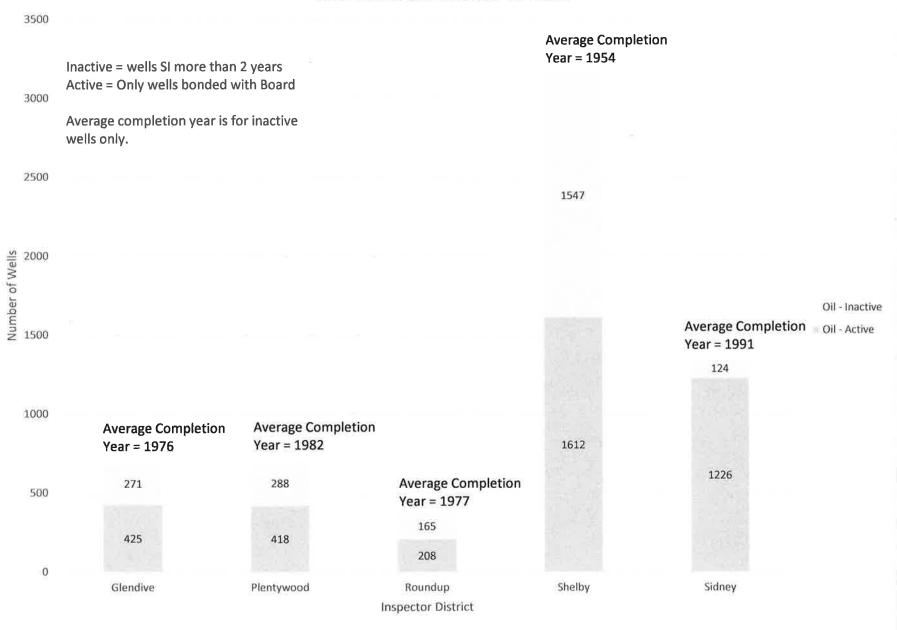

6/14/2023 Page | 3

Important Considerations

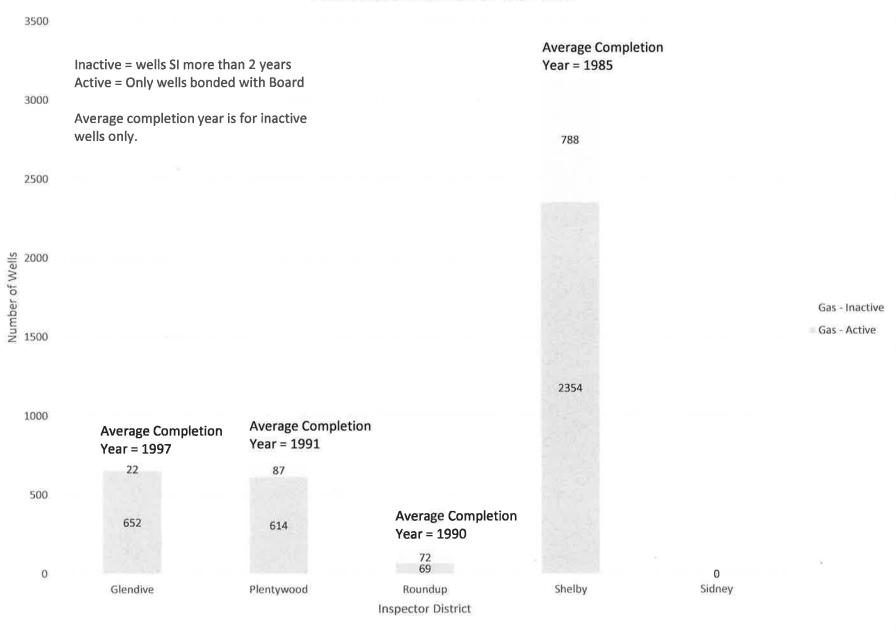

- Inactive wells in northcentral Montana include many inactive "pre-regulatory" wells, and
 changes in bonding requirements can have immediate impact on producing wells included on
 the same multiple well bonds; the importance of those wells to the local economy is well
 known, broadens the stakeholder base, and adds complexity to the development of a state-wide
 solution.
- Shallower wells have lower plugging costs and are also drilled and operated under different economics. Increased bonding requirements for transfers or stripper wells would likely result in more orphan wells.
- Flexibility to allow for continued well operation of wells and maximum resource recovery as required under statute is necessary.
- Proposed federal regulations such as methane rules can have a significant impact on existing wells.

Colin Moody

Wyoming Professional Geologist PG-3746 Texas Professional Geoscientist 12284

> 1245 Hayes Ave Meeteetse, WY 82433

cmoody@midwayenergyllc.com

Introduction

Highly qualified and motivated Professional Geologist specializing in oil and gas exploration and production. Co-Founder of independent Oil and Gas production company exploiting mature, underdeveloped oil and gas fields utilizing well efficiency increases, downspace drilling, cutting edge well stimulation, and utilizing technology.

Summary of Qualifications

- ✓ Professional Geologist; Texas & Wyoming
- ✓ Multi Basin experience working as a prospect generating and operations geologist.
- ✓ Reserve report generation under SEC/SPE guidelines.

Professional Experience

Midway Energy, LLC. Meeteetse, WY (December 2018-Present) Co-Founder/Managing Member

- Co-developed and participated in drilling of successful wildcat well in Ochiltree Co, TX
- Identified and partnered with a local Illinois Basin operator to purchase a producing lease in White County, IL in which we recompleted and fracture stimulated the existing producing well and washed down and recompleted a SWD well in Oct. 2019. Adding 2 PUD locations to 60 acre leasehold and \$50,000 net monthly CF.
 - Pioneered fracture design incorporating proprietary chemical blend and utilizing newly tested sand concentrations and mesh size in successful treatment of recompleted well.
- Drilled and frac'd 2 additional wells in White County, IL Dec 2019. Expected to be online and producing Feb 2020.
- Co-founded Midway Energy, LLC in December 2018 as an E&P Company with emphasis on mature oil fields in the Rockies and Mid-Continent basins.
- Purchased 20% working interest in producing oil well in San Juan County, Utah increasing Midway's monthly net CF \$5,000/mo.
- Evaluated, pursued, purchased Mackay Dome field, Carbon County, MT in Feb 2018.
- Returned Mackay Dome to production after being shut-in for 3.5 years, increasing.
 Midway's production by 110 BOPD and adding \$1.47MM PV10 of reserves to portfolio.

- Designed and performed retrofit of tank battery which incorporates steam lines to oil tanks which heats the heavy oil produced at Mackay Dome.
- Leased additional 340 acres adding 14.8 Net drilling locations to Illinois portfolio with intention of drilling the additional locations and stimulating wells utilizing the aforementioned frac design.

Dome Energy AB, Houston TX (October 2014-February 2019) Head Geologist and Workover Supervisor

- Worked with drilling team to pick 6 new locations to begin Q1 2018 drilling program in Illinois Basin, with 6 out of 6 performing at projected production curve and within \$100,000 of budgeted AFE of entire 6 well drilling and completion program. Company's latest 12 wells drilled in Illinois Basin have exceeded or matched production projection.
- Lead company into 2017 acquisition of 1500 acres in Illinois with 33 newly confirmed drilling locations, initial success rate is 100% with 4 of 4 wells proving economic and behaving right on predicted production rate decline.
- Responsible for additional acreage acquisition and reserve increase of 129 Net drilling locations and 5.32 MMBO of which 34 are PUD and 1.402 MMBO of proven reserves.
- Maintain company's corporate reserve drilling database and update as necessary to fulfill SEC regulatory guidelines, recommend which wells to drill to maximize reserves.
- Plan and provide geologic guidance and budget for Dome Energy's annual budgets.
- Provide all geological, geophysical, and petrophysical data to 3rd Party engineers for all company's corporate reserve reports, both quarterly and annually.
- Initiate recompletion program for Orangefield resulting in 100MBO increase to reserves.
- Began well test program for all producing wells; utilizing fluid levels shots, well head cuts, and projected down-hole pump output in to optimize well production.
- Integrate 3-D seismic, sub surface mapping, well log correlation to plan and coordinate Dome Energy's 2015 drilling program at Orange Field, in Orange County, TX.
- Work with drilling and completions engineers to drill and complete 2 development wells in Orange Field, January 2015 which added 400 BOEPD to Dome Energy.
- Perform well-site geology and mud logging for development wells at Zimmerman Butte,
 Hot Springs County, WY and supervise directional and MWD to ensure ideal bottom-hole well path placement and bottom-hole locations.
- Work with Asset Management Team to streamline multi well pad drilling plan designed to minimize cost, increase efficiency, and minimize environmental impact of drilling plan.

GAS Ventures LLC, Thermopolis WY (June 2008-October 2014) Geologist

 Work with contractors to design and shoot 14 square mile 3-D over Zimmerman Butte field, Hot Springs County, WY facilitating a drilling program adding 200 MBO of reserves.

- Work with Asset team to budget and plan drilling development program at Zimmerman Butte utilizing seismic data and subsurface mapping.
- Initiate company's entrance into the Trenton/Black River play in southern Michigan through a JV which we jointly developed a grassroots prospect that was drill ready when company was purchased in fall of 2014 in Jackson County, MI.
- Managed purchase of 2-D seismic to define Trenton prospect in Washtenaw County, MI which lead to leasing of 1000+ acres and the permitting of a 3-D seismic survey prospect is drill ready and held by former owners of GAS Ventures LLC.
- Provide geological information to WOGCC, EPA, and DEQ for disposal of water in Phosphoria and Tensleep formations in Hot Springs County, WY.
- Recommended and completed 5 well EOR polymer injection program which added over 100MBO in reserves and resulted in an increase \$1.5 million in cash flow in 2014 Hot Springs County, WY.
- Led leasing campaign, planned, and successfully executed 3-D seismic program in Grand Traverse County, MI resulting in company's initial drilling prospect in Northern Reef Trend in the Michigan Basin.
- Contacted and collaborated with partner to drill and complete company's initial wells in Trenton Oil play in Lenawee, County Michigan.
- Supervise MWD, open-hole logging, and directional drilling of all GAS Ventures wells.
- Oversee and supervise landman, contract geophysicist, and accounting departments for all of Michigan Basin activities.
- Provide well-site geology on drilling wells in Bighorn and Wind River Basin of Wyoming.
- Work closely with engineering, land, and management to ensure safe, successful, and cost-effective implementation of yearly budgetary and development drilling programs.

Uranium One, Casper WY (August 2007-June 2008) Geologist

- Supervise 6 drilling rigs performing test drilling of uranium deposits in Powder River Basin, WY.
- Maintain budget and give guidance to management regarding drilling costs and personnel requirements for continuous drilling program in Powder River Basin WY.
- Provide well site geology and sample logging for test drill holes at Moore Ranch Project,
 Campbell County, WY.

Energy Metals, Casper WY (February 2007-August 2007) Staff Geologist

 Provide Well Site work and planning for exploratory uranium deposits in Converse County WY.

- Work closely with field personnel to streamline and safely implement aggressive drilling plan to develop mine sites in Campbell and Converse County WY.
- Supervise Coring and open hole logging of test holes for exploratory uranium deposits.

High Plains Uranium, Casper WY (January 2006-February 2007) Geologist and Drilling Supervisor

- Supervise drilling rigs to develop Allemand-Ross Uranium Mine Converse County, WY.
- Plan and implement baseline water quality monitor ring at Allemand-Ross Mine.
- Spearhead leasing and claim staking for development of Ludeman Ranch uranium pilot project at Converse County, WY.

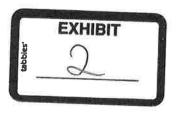

Skills and Expertise

- Excellent communication and personal skills.
- High level of technical experience in complex subsurface geological environments.
- Proficient in Microsoft Office Suite, Petra, IHS Energdeg, ArcGIS, AutoCAD.
- Trained to use Echometer Fluid Level Gas Gun, Dynometer, and supporting software.

Education/Certifications

- Bachelor of Science, Geology, December 2005 University of Wyoming
- Wyoming Registered Professional Geologist, PG-3746
- Texas Registered Professional Geologist, PG 12284
- PetroSkills Oil and Gas Reserves Evaluation Training Course

Midway Energy LLC

Plan of Action

Company Foundation and History

- Formed in December 2018 by Colin Moody with goal of growing an oil and gas company from grassroots. Funded internally with no debt.
 - See attached CV for full work history.
- Staff consists of 5 people. Mr. Moody as Managing Member, 1 salaried Field Supervisor/Pumper, 1 full time contract Controller/CFO, 1 part time contract Production Accountant also handles production reporting, and 1 part time contract AP/AR Office Manager.
 - Majority of staff worked together at GAS Ventures (oil and gas operator) in Thermopolis
 WY
- Total well population in Montana 15 operated wells
- Non-op WI in 3 other states, dominantly TX

Plan Forward

Mackay Dome:

It is Midway's goal to continue as a responsible and prudent operator and to increase the company presence and production through well reactivations and enhanced oil recovery techniques. The company plans to return the Foothills 1H/2H to production in June or July of 2023 which will add an additional 27mbo of reserves at \$35/bbl oil price run.

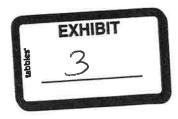

With the Foothills 1H/2H reactivated and active, and the Federal 3H well P&A'd, which is ongoing, all wells in the field will be 100% active and will continue to be viable and economic for years to come, expected daily production is around 110bopd for the field.

Midway committed to plugging the Federal 3h well in 2022, but the contractor continuously delayed mobilization citing abundance of work plugging local wells due to the Federal Grant to plug orphan wells on Federal lands located in Wyoming. Midway worked diligently to find another contractor to complete the plugging work, but all cited the same scenario with respect to the guaranteed P&A work versus a one off single well. Rig/cementing services/and wireline services have all be secured for the P&A of the Federal 3H and are slated to commence plugging operations mid-June.

Dean Dome:

Dean Dome is a gas field which was shut-in 2009 due to low commodity pricing. Midway has 6 wells in the field. When shut-in, the field was producing around 500mcfpd. All wells are completed in the Greybull formation, but only the Orr 1 and 2 are completed in the gas leg of the Greybull formation, the others are completed in the heavy oil portion of the structure and could be perforated in the gas leg to add additional gas production to the field.

The plan is to market this field, as it still has significant gas reserves. 2 companies have expressed interest in utilizing the gas as a source feed for cryptocurrency mining operations.

Burlington Northern 4-3

This well is currently permitted as a water source well. When Midway acquired the well package, the previous operator indicated the surface owner expressed interest in taking ownership in the well to provide agricultural water. Midway will track down the surface owner and assign over the wellbore.

Hunt Creek 1H

Well is currently under consideration for plugging, it is Midway's goal to begin plugging operations in spring of 2024. Midway is working with Ren Gardner of Welter Consulting to prepare a plugging procedure which will be submitted to the MBOG when complete.

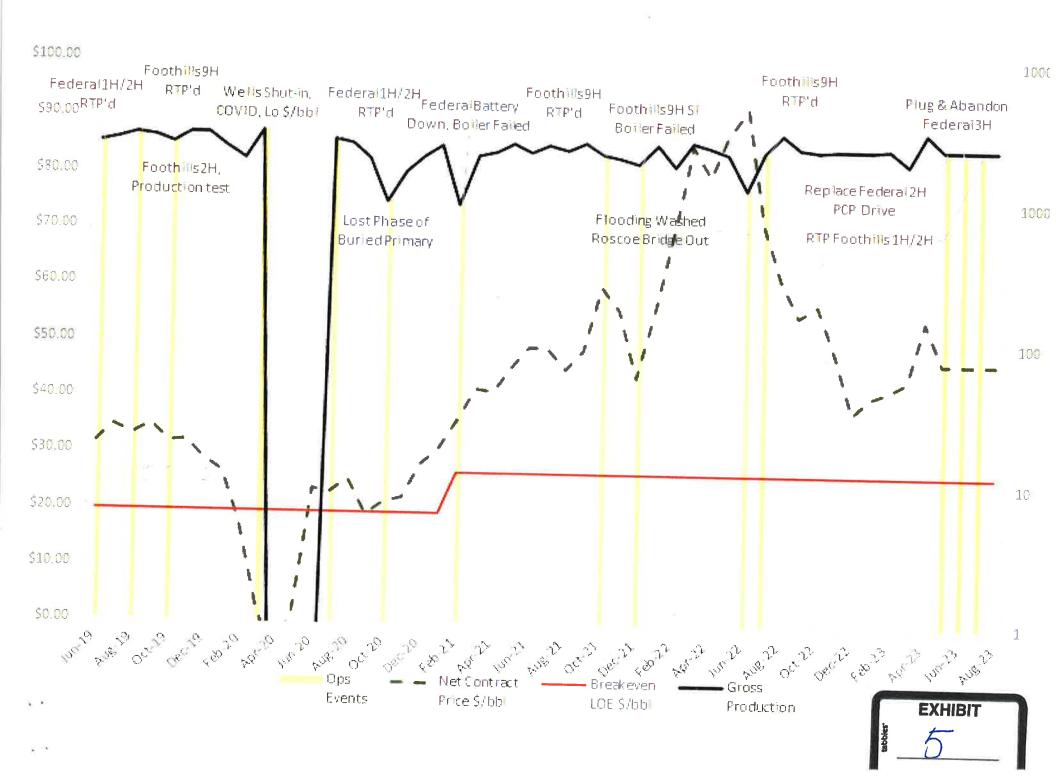

Significant Event History

Midway Energy Timeline of Operations

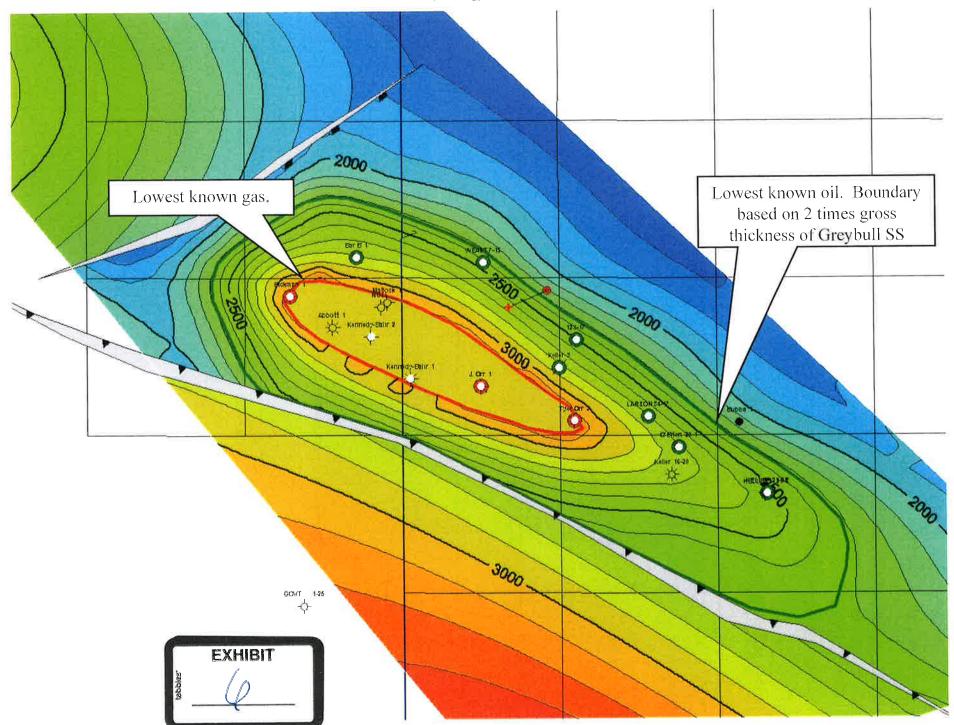

- December 2018-Formed Midway Energy LLC, purpose of acquiring oil and gas production
- February 2019-Signed PSA to acquire 15 well package located in Montana from Greylock Energy
- April 2019-Aquired cash bonds to allow for operatorship of purchased well package \$95,000 in bonds
 - o 2x Single well bonds \$10,000/well, total \$20,0000
 - Montana blanket bond of \$50,000
 - o Federal well bond of \$25,000
- May 2019- Began work to return Mackay Dome to production, multiple facility/well work required after production had been shut-in for 3+ years
- May 2019- Secure oil purchase contract with Phillips66 in Billings, MT.
- Late May 2019- Returned Federal 1H/2H wells to production
 - Utilizing the Foothills 6D (state of Montana bond) as disposal well
- June 2019- First Sales and consistent operations from Mackay Dome
- August 2019- Returned Foothills 9H to production
- October 2019- RTP Foothills 1H/2H to test, treater issues report 52bbls of production to 2H
- February 2020-Beginning to see significant decrease in oil prices, net contract purchase price for Feb 2020=\$17.28/bbl. Running economics to determine breakeven costs.
- March-June 2020-All wells shut-in due to extremely low commodity prices. Laid field staff off.
 - March net contract price/bbl=\$2.8/bbl
 - April net contract price/bbl= -\$6.50/bbl
 - May net contract price/bbl= \$1.67/bbl
 - June net contract price/bbl= \$23.97/bbl
- July 2020- RTP Federal 1H/2H
- October/November 2020-Lost a phase of buried primary power, required to plow in new primary power leg, \$24,000 capital required. 30 days of downtime with 0 production
- February 2021-Boiler at Federal well battery failed, waiting on parts which were delayed by covid related supply chain issues. 12 days of downtime with 0 production
- October 2021- RTP Foothills 9H
- December 2021 Shut-in Foothills 9H due to boiler failure, wait on parts to fix (3-6mo out due to supply chain issues)
- June 2022- Heavy rainstorms create flooding in Roscoe/Red Lodge area, washing away bridges to and from the Mackay Dome field. 7 days of downtime with 0 production.
- June 2022- Submitted plugging notice to BLM to P&A Federal 3H, signed contract with Continental Well Service (Casper, WY) to commence well plugging in August 2022. Continental delayed mobilization continuously citing abundance of work plugging local wells due to the Federal Grant to plug orphan wells on Federal lands located in Wyoming.
 - o Federal Grant also applied to Montana having the same net effect of committing service companies to consistent P&A work, and neglecting other operator's plugging obligations.
- July 2022- RTP Foothills 9H, Boiler parts sourced and installed

- May 2023- Drive Head on Federal 2H failed, replaced with Drive Head stacked in yard, 4 days of downtime 0 production
- June/July 2023-Plan to RTP Foothills 1H/2H having sourced new treater parts and installing new VFD and water transfer pump.

BEFORE THE BOARD OF OIL AND GAS CONSERVATION OF THE STATE OF MONTANA

IN THE MATTER OF MIDWAY ENERGY, LLC INACTIVE WELLS IN CARBON, MUSSELSHELL, AND STILLWATER COUNTIES, MONTANA.

ADMINISTRATIVE ORDER 7-A-2023

On November 16, 2022, staff received an email and a phone call from a landowner requesting that the locations of the J. Orr 1, Tyler Orr 2, and Keller 3 wells, operated by Midway Energy, LLC (Midway), be plugged and abandoned and the locations restored. The wells had not had production in over two years. A subsequent review determined that eleven of Midway's fifteen wells it operates in Carbon, Musselshell, and Stillwater Counties, Montana, have been inactive for more than two years.

On December 20, 2022, a certified letter was mailed to Midway requesting a plan and schedule of abandonment for the inactive wells or justification with supporting documentation for leaving the inactive wells unplugged. This request was made in accordance with ARM 36.22.1307. No response was received.

On March 9, 2023, a follow up email was sent. Midway responded with a review of each well. No reduction of plugging liability had been included in Midway's response.

Scotti Gray, attorney, and Colin Moody, geologist and co-owner, appeared on behalf of Midway to provide an update. Midway testified it planned to: 1) reactive the ECA Foothills 1-H and ECA Foothills 2-H wells in June or July 2023; 2) plug and abandon the ECA Federal 3-H well in mid-June 2023; 3) sell the six wells in the Dean Dome Field and if Midway is unable to sell the wells it will plug and abandon the wells; 4) transfer the Burlington Northern 4-3 well to the surface owner; and 5) plug and abandon the Hunt Creek 1-H well in the spring of 2024.

Mr. Moody requested additional time to complete the above work due to limited contractor availability.

Staff expressed concerned about the Hunt Creek 1-H well. At the October 9, 2019, business meeting, Midway stated it planned to plug the Hunt Creek 1-H well and was waiting on bid proposals. Since 2019, no intent to abandon the Hunt Creek 1-H well has been received and the well remains unplugged.

As of the June 14, 2023, business meeting, Midway has reactivated one of its of its shut-in wells since taking over the wells four years ago.

IT IS THEREFORE ORDERED by the Board that Midway must provide staff a detailed well plan with a timeline and benchmarks for reactivating, transferring, or plugging its inactive wells prior to July 26, 2023. Staff will provide the Board an update at the August 9, 2023, business meeting of Midway's report and its progress to reduce its plugging liability.

IT IS FURTHER ORDERED that Midway appear at the December 7, 2023, public hearing to provide an update of its activities to reduce its plugging liability by either plugging wells or returning wells to production.

Dated this 14th day of June, 2023

Montana Board of Oil and Gas Conservation

Benjamin Jones, Administrator

6/15/2023 Hearing

Docket Summary

52-2023	Heritage Energy Operating, LLC	Temporary spacing unit, Bakken/Three Forks Formation, 28N-57E-3: all, 4: all, 200' heel/toe, 500' lateral setbacks. Apply for permanent spacing within 90 days of successful completion.	Continued	Should have language that operations must commence from 1 year after date of order? Continued to August hearing, email received 6/13/23.	
53-2023	Kraken Oil & Gas LLC	Permanent spacing unit, Bakken/Three Forks Formation, 25N-59E-23: all, 24: all, 25: all, 26: all, 35: all, and 36: all (Alligator 23-26-35 #1H, Alligator 23-26-35 #2H, Alligator 23-26-35 #3H, and Alligator 24-25-36 #4H).		OTSU, Order 79-2022 Additional wells, Order 80-2022 Related applications: 53-2023, 54-2023	
54-2023	Kraken Oil & Gas LLC	Pool, permanent spacing unit, Bakken/Three Forks Formation, 25N-59E-23: all, 24: all, 25: all, 26: all, 35: all, and 36: all (Alligator 23-26-35 #1H, Alligator 23-26-35 #2H, Alligator 23-26-35 #3H, and Alligator 23-26-35 #4H). Non-consent penalties requested.		Related applications: 53-2023, 54-2023	
55-2023	Kraken Oil & Gas LLC	Permanent spacing unit, Bakken/Three Forks Formation, 25N-59E-30: all, 31: all (Katrina 30-31 #1H, Katrina 30-31 #2H, Katrina 30-31 #3H, and Katrina 30-31 #4H).		OTSU, Order 104-2019 Additional wells, Order 22-2021 Related applications: 55-2023, 56-2023	
56-2023	Kraken Oil & Gas LLC	Pool, permanent spacing unit, Bakken/Three Forks Formation, 25N-59E-30: all, 31: all (Katrina 30-31 #1H, Katrina 30-31 #2H, Katrina 30-31 #3H, and Katrina 30-31 #4H). Non-consent penalties requested.		Related applications: 55-2023, 56-2023	
57-2023	Kraken Oil & Gas LLC	Permanent spacing unit, Bakken/Three Forks Formation, 25N-59E-29: all, 32: all (Leah 29-32 #1H, Leah 29-32 #2H, Leah 29-32 #3H, and Leah 29-32 #4H).	Continued	OTSU, Order 106-2019 Additional wells, Order 18-2022 Related applications: 57-2023, 58-2023 Continued to August hearing, email received 6/6/23,	
58-2023	Kraken Oil & Gas LLC	Pool, permanent spacing unit, Bakken/Three Forks Formation, 25N-59E-29: all, 32: all (Leah 29-32 #1H, Leah 29-32 #2H, Leah 29-32 #3H, and Leah 29-32 #4H). Non-consent penalties requested.	Continued	Related applications: 57-2023, 58-2023 Continued to August hearing, email received 6/6/23.	
59-2023	Kraken Oil & Gas LLC	Designate overlapping temporary spacing unit, Bakken/Three Forks Formation, 28N-58E-1: all, 2: all, 11: all, 12: all, 200' heel/toe setbacks, well at a location proximate to the common boundary between the temporary spacing unit 28N-58E-2, 11, and permanent spacing unit 28N-58E-1, 12. Apply for permanent spacing within 90 days of completion. Operations must commence within one year of date of order. The overlapping temporary spacing unit shall be limited to production from the proposed horizontal well.		28N-58E-1, 12: PSU, order 181-2012 28N-58E-2, 11: TSU, order 303-2010 - no current development plans	

60-2023	Kraken Oil & Gas LLC	Temporary spacing unit, Bakken/Three Forks Formation, 26N-58E-31: all, 25N-58E-6: all, 7: all, 200' heel/toe, 500' lateral setbacks. Apply for permanent spacing within 90 days of successful completion. Operations must commence within one year of date of order. Vacate Orders 205-2014 (Temporary spacing unit, Bakken/Three Forks Formation, 25N-58E-6: all, 7: all) and 325-2014 (Amend Order 205-2014 to authorize the drilling of up to 5 horizontal wells, 500' lateral, 200' heel/toe setbacks in temporary spacing unit, Bakken/Three Forks Formation, 25N-58E-6: all, 7: all.).	
61-2023	Kraken Oil & Gas LLC	Authorize the drilling of up to three additional horizontal wells, temporary spacing unit, Bakken/Three Forks Formation, 26N-58E- 31: all, 25N-58E-6: all, 7: all, 200' heel/toe setbacks and 500' lateral setbacks.	
62-2023	Forza Operating, LLC	Authorize the drilling of three additional wells, permanent spacing unit, Nisku Formation, 35N-1E-20: all, 330' setbacks.	
63-2023	Forza Operating, LLC	Authorize the drilling of three additional wells, proposed permanent spacing unit, Nisku Formation, 35N-1E-27: all, 330' setbacks. Related applications: 63-2023, 31-2023	
64-2023	Forza Operating, LLC	Authorize the drilling of three additional wells, proposed permanent spacing unit, Nisku Formation, 35N-1E-29: all, 330' setbacks. Related applications: 64-2023, 32-2023	
65-2023	Forza Operating, LLC	Authorize the drilling of three additional wells, permanent spacing unit, Nisku Formation, 35N-1E-34: all, 330' setbacks.	
66-2023	White Rock Oil & Gas, LLC	Amend 80-2008 (Exception to drill additional Bakken Formation well in the permanent spacing unit comprised of 24N-56E-13: all and 24: all, 660' setback). Amend setbacks to 200' heel/toe, 500' lateral.	
67-2023	White Rock Oil & Gas, LLC	Authorize the drilling of an additional horizontal well, permanent spacing unit, Bakken/Three Forks Formation, 24N-57E-18: all, 19: Really just asking for amended setbacks for well all, 200' heel/toe setbacks and 500' lateral setbacks. Really just asking for amended setbacks for well authorized by order 87-2008.	
68-2023	White Rock Oil & Gas, LLC	Amend Order 21-2009 (Overlapping temporary spacing unit, Bakken Formation, 24N-56E-13: all, 24: all and 24N-57E-18: all, 19: all; well oriented N-S between existing wells, 660' from exterior boundaries of overlapping temporary spacing unit). Modify setback to 200' heel/toe. Applicant will apply for permanent spacing within 90 days of successful well completion.	
69-2023	White Rock Oil & Gas, LLC	Amend Order 60-2008 (Exception to drill additional Bakken Formation well in the permanent spacing unit comprised of 22N-59E-5: all and 8: all, 660' setback) Amend setbacks to 200' heel/toe, 500' lateral.	
70-2023	White Rock Oil & Gas, LLC	Amend Order 67-2008 (Exception to drill additional Bakken Formation well in the permanent spacing unit comprised of 23N-57E-17: all and 18: all, 660' setback). Amend setbacks to 200' heel/toe, 500' lateral.	

71-2023	White Rock Oil & Gas, LLC	Amend Order 90-2008 (Exception to drill additional Bakken Formation well in the permanent spacing unit comprised of 26N-53E-36: all and 25N-53E-1: all, 660' setback). Amend setbacks to 200' heel/toe, 500' lateral.			
72-2023	White Rock Oil & Gas, LLC	Designate overlapping temporary spacing unit, Bakken/Three Forks Formation, 22N-59E-2: all, 3: all, 10: all, 11: all, 200' heel/toe setbacks, well at a location proximate to the common boundary between the permanent spacing unit 22N-59E-2, 3, and permanent spacing unit 22N-59E-10, 11. Apply for permanent spacing within 90 days of completion. Operations must commence within one year of date of order. The overlapping temporary spacing unit shall be limited to production from the proposed horizontal well.	Withdrawn	Application withdrawn, email received 6/9/23.	
73-2023	White Rock Oil & Gas, LLC	Designate overlapping temporary spacing unit, Bakken/Three Forks Formation, 23N-58E -6: all, 7: all, 200' heel/toe setbacks and 500' lateral setbacks. Apply for permanent spacing within 90 days of completion. Operations must commence within one year of date of order. Amend Board Order 2-2002 to clarify that said order is limited to the Dynneson #11X-5H well. Amend Board Order 254-2005 to clarify that said order is limited to the Norgaard #12-6H well. The overlapping temporary spacing unit shall be limited to production from the proposed horizontal well.			
74-2023	HB Oil, LLC	Change of operator of 16 wells from H&R Energy, LLC to HB Oil, LLC.			П
75-2023	Empire North Dakota LLC	Provide an update of its activities to reduce its plugging liability by either plugging wells or returning wells to production, per Board Order 13-2023.			
31-2023	Forza Operating, LLC	Permanent spacing unit, Nisku Formation, 35N-1E-27: all (Turner 27-1H).		Statewide 160 acres TSU: E½W½ of Section 27, T35N-R1E Related applications: 63-2023, 31-2023	
32-2023	Forza Operating, LLC	Permanent spacing unit, Nisku Formation, 35N-1E-29: all (Grinde 29-1H).		Statewide 160 acres TSU: E½E½ of Section 29, T35N-R1E Related applications: 64-2023, 32-2023	
46-2023	Black Gold Energy Sheridan Facility, Inc.	Change of operator of a commercial disposal well (Sheridan Facility SWD, API # 091-21892) from Cypress Energy Partners - Sheridan SWD, LLC to Black Gold Energy Sheridan Facility, Inc.			
76-2023	Brainstorm Energy, Inc.	Show Cause: failure to file production reports and pay administrative fees.	Dismissed	The delinquent reports/fee was received. Docket administratively dismissed in accordance with policy.	
77-2023	Colossus Operating LLC	Show Cause: failure to pay administrative fees assessed for delinquent reporting.	Dismissed	The delinquent reports/fee was received. Docket administratively dismissed in accordance with policy.	

78-2023	Hesla Oil, LLC	Show Cause: failure to file production and injection reports and pay administrative fees.	Dismissed	The delinquent reports/fee was received. Docket administratively dismissed in accordance with policy.	
79-2023	Reserve Operating Corp.	Show Cause: failure to pay administrative fees assessed for delinquent reporting.	Dismissed	The delinquent reports/fee was received. Docket administratively dismissed in accordance with policy.	
80-2023	Brandon Oil Company	Show Cause: why it should not immediately plug and abandon its wells in Toole County, Montana.			
108-2021	Black Gold Energy Resource Development, LLC	Show Cause: why penalties should not be considered for failure to remedy violations at its Indian Mound 1 well, Section 15, T23N-R55E, Richland County, Montana.

GAS FLARING

June 14, 2023

Flaring Requests

Summary

There are three wells flaring over 100 MCFG per day based on current production numbers.

There are three exceptions requested at this time.

Petro-Hunt -

Borntrager 2C-2-1 - API #25-021-21193, 19N-54E-2

- 1. Flaring 116 MCF/D.
- 2. Completed: 9/2012.
- 3. Proximity to market: >25 miles pipeline.
- 4. Estimated gas price at market: ~\$2/MCF.
- 5. Estimated cost of marketing the gas: ~\$3.2 million.
- 6. Flaring alternatives: None.
- 7. Amount of gas used in lease operations: 7 MCF/D.
- 8. Justification to flare: Uneconomic to connect due to lack of infrastructure in the area.

Walter Senner 19-54 - API #25-021-21192, 19N-54E-18

- 1. Flaring 116 MCF/D.
- 2. Completed: 8/2012.
- 3. Proximity to market: >25 miles pipeline.
- 4. Estimated gas price at market: ~\$2/MCF.
- 5. Estimated cost of marketing the gas: ~\$3.2 million.
- 6. Flaring alternatives: None.
- 7. Amount of gas used in lease operations: 7 MCF/D.
- 8. Justification to flare: Uneconomic to connect due to lack of infrastructure in the area.

Boje Farms 19-54 - API #25-021-21184, 19N-54E-17

- 1. Flaring 111 MCF/D.
- 2. Completed: 2/2011.
- 3. Proximity to market: >25 miles pipeline.
- 4. Estimated gas price at market: ~\$2/MCF.
- 5. Estimated cost of marketing the gas: ~\$3.2 million.
- 6. Flaring alternatives: None.
- 7. Amount of gas used in lease operations: 7 MCF/D.
- 8. Justification to flare: Uneconomic to connect due to lack of infrastructure in the area

Re:

Inactive Well Review-Well Plugging Requirement

To Whom It May Concern:

The Board of Oil and Gas Conservation ("BOGC") records indicate that 27 wells on the attached list have not produced in over 2 years.

When a well is no longer capable of production, the operator has the obligation to plug and abandon the well and to restore the location, as required by ARM 36.22.1303(1).

The owner shall not permit any well drilled for oil, gas, saltwater disposal, or any other purpose to remain unplugged after such well is no longer useful for the purpose for which it was drilled or converted. When a well is no longer capable of production because the underlying reservoir or reservoirs are depleted and there is no possible future use for the well in supplemental recovery operations or for disposal facilities, the operator shall within one year plug and abandon the well as set forth in this subchapter, unless otherwise authorized by the petroleum engineer or his authorized agent.

No later than June 13th, 2023, please submit to this office plans and timelines for plug and abandoning of wells on the attached list. If the well has the potential for future use, please provide a request for the inapplicability of the plugging requirement and well-specific documentation to support the request.

Sincerely,

Ben Davis Technical Program Coordinator Benjamin.Davis@mt.gov

RE:

Cancelation of State of Montana Oil and Gas Lease

State of Montana Oil and Gas Lease OG-20659-79

Township 27 North, Range 2 West

Section 16: All

Pondera County - 640.00 Acres

Dear Lessee,

This letter shall inform you that the above referenced lease is cancelling due to non-production beyond the primary term. This lease has not produced oil or gas since March of 2020. The lease was held by shut-in application for the 2020, 2021 and 2022. As stated in my letter dated April 20, 2023, a fourth consecutive shut-in application will not be accepted and the lease must have returned to production prior to June 5, 2023, to avoid cancellation. According to our records, and Montana Board of Oil and Gas, the lease is still shut-in. This lease has been canceled for non-production beyond the primary term. You will have 10 days from the receipt of this letter to respond.

If you have any questions regarding the contents of this letter, please feel free to contact me at 406-444-9518 or zackary.winfield@mt.gov.

Sincerely,

Zack Winfield

Re:

Inactive Well Review-Well Plugging Requirement

To Whom It May Concern:

The Board of Oil and Gas Conservation ("BOGC") records indicate that 3 wells on the attached list have not produced in over 2 years.

When a well is no longer capable of production, the operator has the obligation to plug and abandon the well and to restore the location, as required by ARM 36.22.1303(1).

The owner shall not permit any well drilled for oil, gas, saltwater disposal, or any other purpose to remain unplugged after such well is no longer useful for the purpose for which it was drilled or converted. When a well is no longer capable of production because the underlying reservoir or reservoirs are depleted and there is no possible future use for the well in supplemental recovery operations or for disposal facilities, the operator shall within one year plug and abandon the well as set forth in this subchapter, unless otherwise authorized by the petroleum engineer or his authorized agent.

No later than June 13th, 2023, please submit to this office plans and timelines for plug and abandoning of wells on the attached list. If the well has the potential for future use, please provide a request for the inapplicability of the plugging requirement and well-specific documentation to support the request.

Sincerely,

Ben Davis

Technical Program Coordinator

J Davis

RECEIVED

JUN 0 9 2023

Mr Davis,

I received your letter dated May 5, 2023.

MONTANA BOARD OF OIL & GAS CONSERVATION • BILLINGS

I have been working on trying to get the Goffena 1 and the Goffena 1 (Horizontal) plugged. I understand they need plugged and I am working on it. Neither of these two wells have been pumped in several years. During the Covid event for the last two years and even currently it has been a real challenge to get a plugging company out there. I have been talking to Liquid Gold trying to get on their plugging list. They are so busy and have not been able to give me a date yet.

The Goffena 1 well just broke a few months ago and started making water. I have been working on plugging since that happened. I spoke with John Gizicki and he was extremely helpful in getting me the names of some other plugging companies. I am waiting on the plugging orders from him so I can send it out for bids and get this done.

I have cut down the trees that you suggested in your pictures. We have fenced and netted the pit that has the oil in it from your photograph. I am also working on getting that hauled away as soon as possible.

I am in the process of fixing the PM well. I have been trying to get an electrician out there for over a year. It just needs a simple fix to get it pumping again. With the boom in construction it is so hard to get an electrician out there. I think I have one lined up in June. I am really anxious to get this fixed and to start pumping it again.

Thank you for your letter,

1 ATT
